RIYADH CEMENT

Company Profile

Introduction

Riyadh Cement was founded in 1997 under the name of Saudi White Cement Company as one of the largest Cement companies in the Kingdom of Saudi Arabia. Over the years, it has earned a reputation for manufacturing Grey and White cement.

Since its inception, Riyadh Cement established robust pillars and values to mark its existential identity in the cement industry. Its focus on continuous growth and development is based on sustainability and quality, exceeding customer expectations and always delivering distinguished premium quality products to meet urban and infrastructure project needs. This commitment allowed Riyadh Cement to be one of the best cement companies locally and regionally.

OUR VISION

.To be a pioneer as the first environmental and developmental of choice in the cement industry

OUR MISSION

Providing a variety of high_quality and eco_friendly products of grey and white cement to meet the needs of our customers through optimal utilization of resources، energy efficiency، sustainable production، and supporting nationalization of jobs with continuous development.

OUR VALUES

- Growth
- Transparency
- Participation and integration
- Quality
- Innovation and Creativity

Company Plant

Riyadh Cement Company has a plant for grey cement and another for white cement, containing (3) highly efficient cement production lines. All the plants operate with the latest equipment and artificial intelligence technologies. They are strategically located in Al_Muzahmiyya Governorate, northwest of the city of Riyadh, which is rich in raw materials of limestone characterized by their high quality and purity.

Grey Cement Plant

The plant contains two production lines with a design capacity of (3.4) million tons of grey clinker annually.

First production line

This is a dual_process line for the production of grey and white clinker of various types. Commercialproduction began in 2007, with a design capacity of 1.7 million tons of grey clinker annually. In 2019, it was developed to produce white clinker with a design capacity of 660,000 tons of white clinker annually.

Second production line

The second production line is dedicated to the production of grey clinker. Commercial production began in 2010 with a design capacity of 1.7 million tons of grey clinker annually.

White Cement Plant

Riyadh Cement's White Cement plant is the first of its kind in the Kingdom to produce white cement. Established in 1997, it has a production capacity of (320,000) tons of white clinker annually.
With this line and Line No. (1), the company can produce approximately one million tons of white clinker annually.

Our Products

ORDINARY PORTLAND CEMENT

Uses:
Ready mix concrete, footings and foundations, concrete pipe manufacturing, precast concrete structures, brick and tile manufacturing.

SASO_GSO 1914/2009 (Type I)	According to Saudi specifications
SASO_ASTM_C150M_2021 (Type I)	According to American specifications
BS EN 197_1:2011 CEM I 52.5N LA	According to European specifications

FINISHING CEMENT

Uses:
Plastering, finishing works, leveling before paving, cement mortar.

SASO GSO 1914 _ CEM II/B_LL 42.5N	According to Saudi specifications
ASTM C91_2005 & ASTM C 1157_2010	According to American specifications
BS EN 197_1:2011 _ CEM II/B_LL 42.5N	According to European specifications

SULFATE RESISTANT CEMENT

Uses:
Basements, drainage systems, dam and bridge construction, concrete pipe manufacturing.

SASO_GSO 1914 (Type V)	According to Saudi specifications
SASO_ASTM_C150M_2021 (Type V)	According to American specifications
BS EN 197_1:2011 CEM I 52.5N SR3	According to European specifications

Our Products

WHITE PORTLAND CEMENT

Uses:
Decoration works, tiles and interlocks, artificial stone, GRC, marble installation mortar, grouting, colored plaster, colored concrete curbs, ceramic works.

SASO_GSO 1914 (TYPE I, WHITE)	According to Saudi specifications
BS EN 197_1:2011 _ CEM I 52.5N	According to European specifications

FINISHING CEMENT

Uses:
Plastering, colored plaster, exterior profile painting, marble installation mortar, decoration, and artwork.

SASO_GSO 1914/2009 & SASO 855_1994 CEM II/A_LL 42.5N	According to Saudi specifications
BS EN 197_1:2011 _ CEM II/A_LL 42.5N	According to European specifications

Our projects

The presence of Riyadh Cement products in most of the Kingdom's projects makes us feel proud and privileged to be one of the success partners of many of the nation's major projects, of various types: "educational, health, military, economic, social, religious, and others."
These major contributions to the construction of these edifices come through our factories providing what our partners, distributors, contractors and real estate developers, need for various types of cement products in implementing these projects.

Quality

The Saudi Organization for Standardization, Metrology, and Quality implements and monitors quality regulations for industrial products to maintain a national framework for local manufacturers in accordance with international standards. We are proud to have met the targets and quality standards in every aspect of our operations, adhering to all local and international standards that guarantee consistency, stability, and the highest levels of quality.

We obtained the Saudi Standards, Metrology and Quality Organization (SASO_GSO) certificate and the quality management certificate (ISO 9001:2015).

Occupational health and safety

We prioritize the health and safety of our employees with stringent policies and procedures designed to ensure a safe working environment throughout every stage of our production processes. Our commitment to safety and sustainability is reflected in our certifications, including ISO 45001 for Occupational Health and Safety and ISO 14001 for Environmental Management. Additionally, our policies adhere to local and international standards, such as those set by the Occupational Safety and Health Administration (OSHA) and the National Fire Protection Association (NFPA). Riyadh Cement Company also holds all the necessary permits from relevant authorities to operate its plants safely and responsibly.

Work Environment

The work environment is fundamental to making Riyadh Cement Company an employer of choice. From the spatial environment to administrative relationships and human values, we ensure the utmost fairness, credibility, respect, integrity, and communication.

Riyadh Cement Company adopted several initiatives to be a lively and competitive environment capable of attracting and retaining highly qualified employees.

An integral part of our policies is to provide people with special needs exceptional attention, providing them with jobs suitable to their abilities and supporting them to successfully deliver on their tasks and responsibilities.

Training and qualification

Riyadh Cement Company is responsible for the continuous development and growth of their employees to have qualified nationals paving the future in the cement sector. In 2022, we launched "Himma": the first cooperative diploma in the cement industry across the Kingdom.

Objectives and benefits of the "Himmah" program:

1. Personal and professional development of the trainee in the cement industry.
2. Gaining quality experiences to keep pace with the industrial development taking place in the Kingdom.
3. Developing professional relationships.
4. A monthly bonus for the trainee.
5. An approved technical certificate in the cement industry.
6. Training ends with employment.

Nationalization

Cement is an important component in the urban development of cities. However, it is more important for complying with environmental standards to minimize and mitigate the environmental harm the industry could cause.

Therefore, Riyadh Cement Company, according to its environmental strategy, complies with and abides by all local and international standards in its factories, along with numerous initiatives to preserve the environment, which enabled it to obtain an environmental safety certificate.

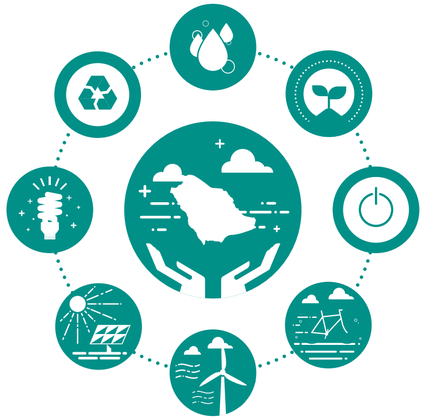

Sustainability

The environment

Cement is an important component in the urban development of cities. However, it is more important for complying with environmental standards to minimize and mitigate the environmental harm the industry could cause.

Therefore, Riyadh Cement Company, according to its environmental strategy, complies with and abides by all local and international standards in its factories, along with numerous initiatives to preserve the environment, which enabled it to obtain an environmental safety certificate.

Our ways to protect the environment

- Using the latest technology in our plants.
- Using eco-friendly materials.
- Applying the highest environmental protection standards.
- Reducing harmful emissions from production lines.
- Adopting numerous initiatives to preserve the environment in accordance with the Kingdom's vision to reach zero carbon emissions.

Social Responsibility

Relevant CSR areas and activities

Support knowledge and culture

- Practical training programs for students of different universities and colleges.
- Site visits for university and college students to the company›s factories.
- Collaborative programs with government agencies in Al_Muzahimiyah Governorate to deliver vocational training and social participation.

Health promotion

Participate in public health awareness campaigns.

Charity work

Motivate our employees to participate in volunteer activities.

Partnerships

We partnered with Irtiqa Association to donate our old computers to charity organizations and those in need.

Riyadh Cement Company is a responsible and caring neighbor to all stakeholders that it impacts directly and indirectly. We aim to always go beyond our business operations to have a positive impact on the local community and our surrounding environment.
